## Standard Features

~4x4 treated skids with 2x4 floor joists 16" on center covered with 3/4" plywood makes for a very solid floor

~Standard wall height is 7'

~Walls are framed 16" on center with interlocking top plates

~Siding is 15/32" primed Duratemp [plywood backing], (vinyl siding available at an added cost)

~Trusses 24" on center with bracing for heavy snow loads. 1/2" plywood sheeting on roof

~Moisture barrier underneath the roof covering on all buildings

~Choose between metal or architectural shingles

~8' wide buildings come with single 4' wide door.

10' and wider come with a 6' wide double door.

(roll-up doors available at an added cost)

~Screened gable vents

~Primed and caulked

## FREE DELIVERY AND SETUP

(within 30 miles)

\$4 a mile beyond 30 miles

~Setup includes blocking and leveling up to one ft.

Customer must either supply blocks or purchase them from the driver for \$2 each

~For a durable foundation, we recommend that you build a level gravel pad. Especially for larger buildings

~Customer responsible for site prep and permits
